

CLIMATE CHANGE

*Don't Let Our Future Melt
Away!*

6 things we can do to prevent

Climate Change

Be more energy-
conservative

Green Your
Commute

Get involved
and vote

Utilize
renewable
energy
sources

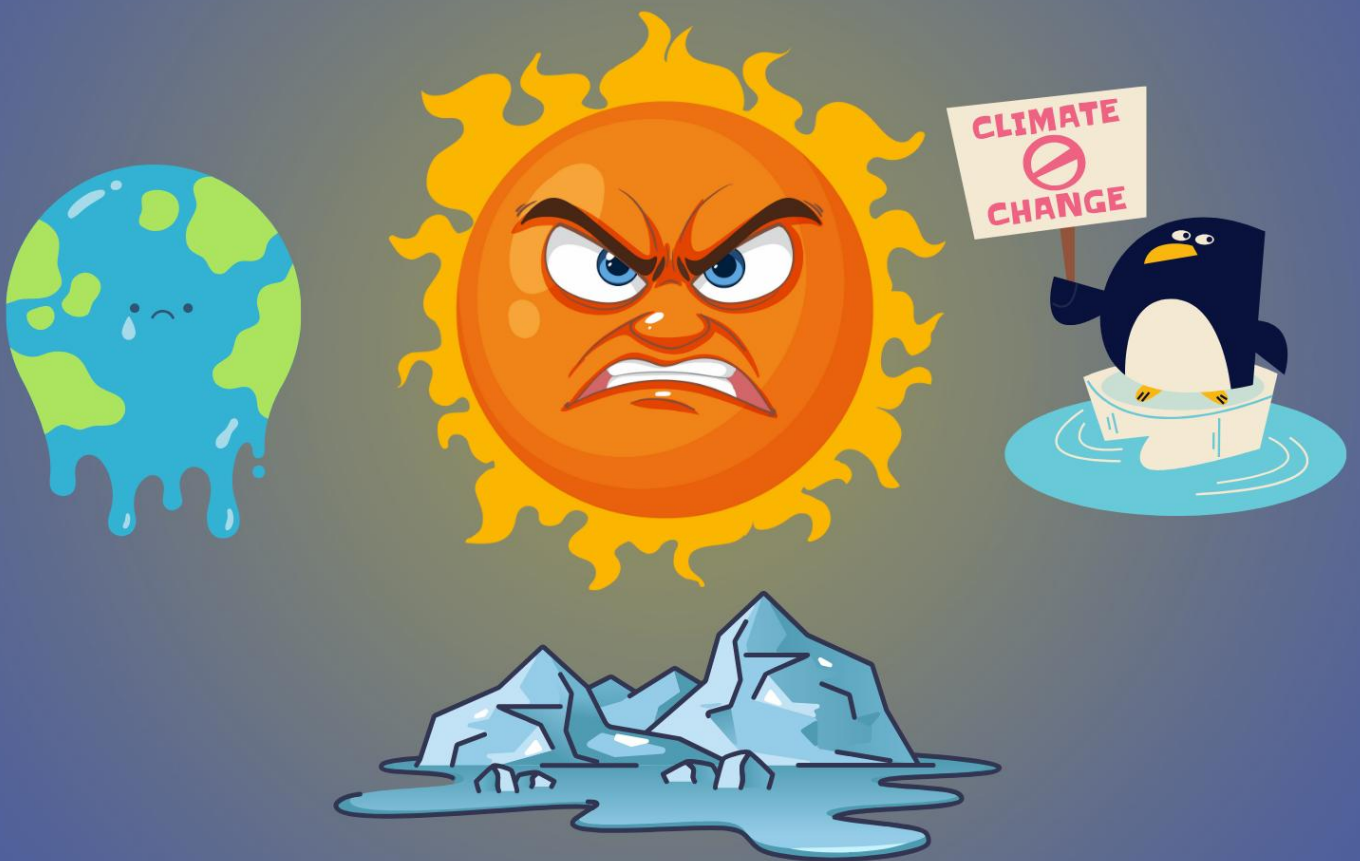

Recycle

Educate yourself and
those around you

CHANGE PEOPLE NOT CLIMATES

SAVE OUR PLANET FROM HEAT

🌳 Ice is melting in the Arctic.

🌳 Climate change means the Earth is getting warmer.

Nisa, Asya ilhan, Kevin

MELTING AWAY

**SWEET EARTH,
SOUR FUTURE.**

Rising temperatures are melting the world, with ice caps disappearing and sea levels rising. "Save the Earth, Stop the Melt."

HOW TO ALLEVIATE THE IMPACT?

Driving less cuts pollution and helps the planet. Try walking, biking, or using public transport.

Protecting forests helps fight climate change, saves wildlife, and keeps our air clean. Trees are key to a healthy planet.

Renewable energy, such as solar and wind, is clean, sustainable, and reduces pollution, helping protect the environment.

"TURN DOWN THE HEAT, TURN UP THE CHANGE."

TIME IS MELTING AWAY

Stop global warming before it melts our future.

Save us from global warming!

**Climate action is a
human reaction.**

**The time is running
out**

**LET'S COOL DOWN THE
PLANET**

THE EARTH CAN'T WAIT!

Don't trash our future –
recycle today

You can't breathe money
– stop the smog

Clean energy, bright
future

A greener world starts
with you

CLIMATE CHANGE

Your paragraph text

Your paragraph text

REDUCE, REUSE, RECYCLE

Minimize waste by reusing items, recycling materials, and opting for sustainable products

PROMOTE SUSTAINABLE TRANSPORTATION

Shift to solar, wind, and hydro power to reduce carbon emissions and fossil fuel reliance

EMBRACE RENEWABLE ENERGY

Shift to solar, wind, and hydro power to reduce carbon emissions and fossil fuel reliance
