Discover the Green Life with Robots – Closing Ceremony

Dear guests, esteemed participants, beloved students, and our valued project partners, Welcome to the closing ceremony of our Erasmus+ project “Discover the Green Life with Robots.” Today, we are gathered here to celebrate the exciting journey of discovering a greener lifestyle and exploring how we can combine technology with environmental awareness.

Throughout this project, we have:

- * Explored how technology can support the protection of our environment,
- * Witnessed how artificial intelligence and robotics can be powerful tools for a sustainable future,
- * And experienced the value of intercultural collaboration and friendship.

Our students worked side by side with their peers from different countries and gained not only knowledge, but also friendship, empathy, and a strong sense of responsibility.

The robotic applications developed during the project transformed ecological awareness into real-world action. Today may mark the end of this project, but it is not a farewell.

The ecological mindset and passion for innovation that we built here will continue to inspire future ideas, initiatives, and international collaborations.

We extend our heartfelt thanks to all the students, teachers, school administrators, national and international partners, supporting institutions, and of course, to the Erasmus+ Programme for making this journey possible.
